

# Be future ready today

Achieve the extraordinary using Copilot in Windows

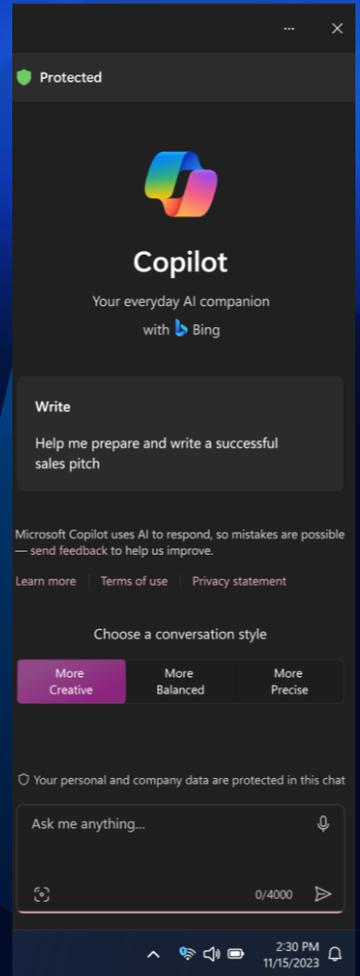

## Supercharge efficiency shielded by commercial data protection and privacy

Achieve more with less effort using Copilot in Windows<sup>1</sup>. Your AI assistant at work does the heavy-lifting so you can do the extraordinary. With Copilot in Windows, you can get better answers, find fresh solutions, and create in new ways.

- AI at your service**  
Get more done with fewer clicks. Copilot in Windows delivers AI at work and brings intelligent tools together in your desktop and is designed to work seamlessly with other Copilots including Microsoft 365 Copilot.
- Hyperfocus on priorities**  
Stay organized and in the flow with one place to get relevant answers to complex questions, tailor settings for your workstyle, set up focus sessions, and refine and clarify your content.
- Innovate faster and easier**  
You'll be done before you know it. Fuel creativity and problem-solving by effortlessly kickstarting writing projects, delivering relevant insights, summarizing documents, and turning text into images.
- Stay private, protected, and confident**  
Increase insights and efficiency while keeping business and personal data protected. Your content and search data will not be saved, used to train AI models, or viewed.
