Republic of Gamers

INFLUENCER SPOTLIGHT

The ASUS Republic of Gamers (ROG) is a world leader in PC gaming and is a continuously growing community with our collaboration with streamers. We support young talent and gaming professionals with the knowledge of 13+ years of history of understanding the needs of gamers. ROG offers the best hardware to players at any level while creating the ultimate gaming experience.

My name is ONE_shot_GURL and Fortnite is my main game! I do play a variety of games as well and really love the Survival, BR, & FPS genres the most. The ROG community is full of talented, kind, hard-working people who all have great taste in PC hardware :) I love being a part of the ROG community and look forward to meeting more gamers and streamers!

My favorite product is my Swift PG278QR 27” Gaming Monitor! I get the smoothest gameplay that allows me to dominate in any game I play.

My name is Justin Wong and Street Fighter V is the game I play because when it comes to competition, I can play with anyone around the world. Being part of the ROG Community is awesome because they help me with opportunities where I am able to give back to the gaming community. I look forward to continuing being part of the ROG community to help more aspiring gamers on a competitive and personal level.

My favorite product is the ROG Strix Scar III because wherever I am, it comes with me to keep me on point with work, streaming, and gaming.

Grimmmz

Total Fans:
1.3M

My name is Grimmmz and Tarkov is my current game since it includes a high difficulty experience that rewards the best satisfaction after a successful game. I went with ROG because I already felt very comfortable using their products, whether it was my browsing or recommended by a friend during my fighting game days. It's just felt like it was meant to be, plus other folks I go way back with happen to be part of the team! I'm hoping to see ROG reach new heights with new hardware and inviting more talented individuals passionate about gaming.

My favorite ROG product definitely has to be the monitor. I've been using ASUS monitors way back when I used to attend fighting game tournaments, they were also the standard monitors to use at EVO; the biggest fighting game tournament in the world. When I transitioned to PC games, naturally I went with ROG monitors. I use the XG258Q monitor at the moment.
