

Get started with one hub for hybrid learning

As you transition back to school, centralize the whole learning experience in one hub—simplifying IT administration and helping students succeed both on campus and at home. Save 216 hours per instructor per year with Microsoft Education¹.

Bring together online classes, assignments, files, collaboration, accessibility tools, and apps in **one central hub with Microsoft Teams**

Explore the **portfolio of Surface and Windows 10 devices** with touch and inking for more experiential and accessible learning, plus LTE options

Rely on built-in **accessibility features in Office 365** to include all learners, including those with physical or invisible disabilities

Use **Power Platform** within Teams for data-driven insights and custom, no-code solutions—so you can personalize learning and streamline processes

“Microsoft products were the natural winner. The idea of having **everything on a single ecosystem, plus the ease of use**, just allowed our staff to achieve more with less effort.”

John Billington
Head of Services, Hugh Baird College

“Using Teams grabs the students’ attention and **makes learning part of their everyday lives...** What was their learning community? Their learning community was Teams.”

David Kellermann
Senior Lecturer, The University of New South Wales

How we can help with your hybrid learning needs

Connect users to resources remotely, including hands-on virtual labs through Azure Lab Services or tailored application access through Windows Virtual Desktop.

Host virtual events for up to 20,000 users using Teams Live Events, with capabilities for slideshow presentations, live captions, guest speaker access, and more.

Create class teams automatically using School Data Sync, which pulls data from your SIS rosters to generate classes and groups in Teams, InTune for Education, and third-party apps.

Train faculty and staff with free online resources, including hundreds of learning paths on Microsoft Learn. Get personalized assistance from Microsoft Store specialists to help you every step of the way.

Hold orientation in hybrid learning scenarios, leveraging Teams for live sessions, socialization, and assigned content. Breakout rooms are coming in Q4 of 2020.

Gain data-driven insights about student performance, crucial institutional statistics, and more using the analytical capabilities and intuitive data dashboards of Power BI.

Automate and digitize processes with low-to-no-code apps and flows in Power Apps and Power Automate—or use Power Virtual Agents for chatbots that engage conversationally with users.

Build custom solutions for student engagement, internship and scholarship tracking, grant applications, aggregated system views, and much more using Dynamics 365, built on Dataflex Pro.

✓ Security

With over 3,500 global security experts and \$1 billion invested annually in security, Microsoft uses cutting-edge technology to defend your data.

✓ Compliance

Microsoft offers the broadest set of compliance certifications, including over 90 offerings specific to education and global regions.

✓ Accessibility

The Microsoft 365 suite comes with one of the most comprehensive sets of accessibility tools—Immersive Reader, Seeing AI, captions, and more.
