⟲ CLOUD BACKUP
for Office 365

Protect your Office 365 customers and grow recurring revenue

Data protection is necessary, even in the cloud

Using cloud-based services provides customers significant advantages with regards to scalability, cost, productivity, and efficiency. However, the cloud still poses security risks for users, as viruses, ransomware, and other data breaches can impact user data in the cloud.

Office 365 provides redundancy, which ensures the availability of the present state of the data but does not back up the data to protect against data loss events.

Cloud Backup for Office 365

Office 365 is the best way for SMBs to work remotely and stay productive during and after COVID-19. Help SMBs make the move with SkyKick's migration automation and add Cloud Backup for complete coverage. Cloud Backup helps you protect SMB data and grow your cloud practice — it fills in native Office 365 gaps, improves customer retention, and establishes recurring cloud revenue.

Complete O365 Protection   Differentiate Offering   Double O365 Recurring Revenue   Improve Customer Retention

Reliable and secure

SkyKick Cloud Backup uses industry leading 256-bit encryption at rest and 128-bit in transit. Your customer's data never leaves the Azure environment, which ensures all the inherent security and compliance capabilities that Azure offers.

Up to 6 backups a day

SkyKick Cloud Backup takes multiple snapshots at regular intervals throughout the day. This ensures that the backups keep up with your customers.
