Hackers can see the solution in the MX record, making it vulnerable to MX REQUIRES MX record bypass.

For a modern Microsoft 365 email security solution that will work for your clients and also your business?

Choosing a Solution

1. Low Maintenance

Busy MSPs want to focus less on maintaining additional solutions and more on growing their business.

2. Advanced Protection

Sophisticated email threats require predictive and continuous protection.

3. Configuration

No external quarantine means avoiding set-up of complex rules and configurations and no quarantine monitoring.

4. Remediation

Reported threats that reach a threshold are auto-remediated by the AI across all users.

EVALUATING MICROSOFT 365 EMAIL SECURITY SOLUTIONS

THREAT DETECTION
