PRODUCTIVITY ON THE GO
Increase Your Efficiency at Work

Adding a second screen to your work setup is one of the best ways to boost productivity, as you can manage multiple tasks simultaneously and see everything at a glance. But if you think that this is only good for office desks, think again: with the sleek new ZenScreen, you can stay productive even on the go.

3-Year Warranty

For peace of mind, ZenScreen portable monitors come with a three-year warranty (two-year options for OLED panels).

A-Level Grade Panel

Spending a lot of time on conference calls during your business trips? Keep your clients or colleagues on your ZenScreen, and use your laptop's display to look at specific websites, presentations, mockups and other relevant content.

Build with High Quality Design

If your workflow involves using multiple programs at the same time, you know how constantly switching between windows can be a pain. Ditch the switching; get more workspace and keep all that's important within sight.
