Device Mode (BYOD Mode) Overview

Yealink meeting devices offer multiple operation modes for various meeting scenarios. In Device Mode (also known as BYOD Mode/ General Mode), the device functions as a plug-and-play solution, allowing users to connect their laptops and run any third-party video conferencing platform while utilizing the room's integrated audio and video system. This mode provides flexibility for rooms that need to support multiple software platforms. Additionally, Device Mode includes the following features for enhanced user experience:

- Touch Console or Remote Control: Allows intuitive control via a touch console or remote.
- HDMI Output: Enables connection to an external display.
- One Cable Desktop Connection: Simplifies setup with a single cable connection.
- Customizable TV Wallpaper: Change the display wallpaper for a personalized room environment.
- App Support: Access a variety of apps&widgets to enhance meeting functionality.
- Remote Management

These features make Device Mode a flexible, efficient, and user-friendly solution for any meeting environment.
