EDUCATION SOLUTIONS

Logitech makes it easy for schools, colleges and universities to transform teaching and learning experiences to maximize learning outcomes

THE FUTURE OF EDUCATION IS HERE

Education is changing. Today's students are seeking schools, colleges, and universities that offer programs outside of the traditional classroom that support learning from anywhere and from any device. To stay relevant, educational institutions must incorporate technology into the fabric of teaching and learning.

With 35 years of experience designing innovative technology that is cost effective, simple to use, deploy and manage, Logitech makes it easy to transform teaching and learning experiences. Our goal is to help foster the continuous development of students knowledge and skills, through formal education in the classroom and beyond.

From peripherals for mobile devices and desktops to purpose built video collaboration solutions for the classroom, our high-quality solutions enable institutions to expand access to learning to a more diverse student body, foster the development of innovative teaching methods, support interactive research learning environments, streamline administration, and maximize student results.
