

Lexmark Testing Assistant for K-12 and Higher Education

Ready to raise standards and test for remediation by lowering the cost and time barriers associated with preprinted test forms and off-site scoring?

With Lexmark Testing Assistant, you can now afford to test your students more often and for less expense, without adding to your education's team's workload.

Lexmark helps to solve 3 of the top 10 education challenges

 #1 Overcrowded classrooms	 #4 Technology in the classroom	 #7 Test scores not being used for remediation

use Lexmark

Simplify and speed student assessment

Accessibility

The solution is accessible from virtually any web browser on PCs, Mac and tablets, with nothing to install and no IT resources required. It also adheres to a full spectrum of security standards for a safer, more productive education environment.

Print Tests

The Print Test option enables you to download and print personalized answer sheets from your computer, and answer sheets can be printed on demand using plain paper to save even more time and money.

Grade test

Scanned completed answer sheets from the Lexmark MFP are sent directly to the cloud where tests are automatically processed.

Administer online testing

Using the testing designer, simply email the test link to your students and they can submit it directly to the cloud for grading.

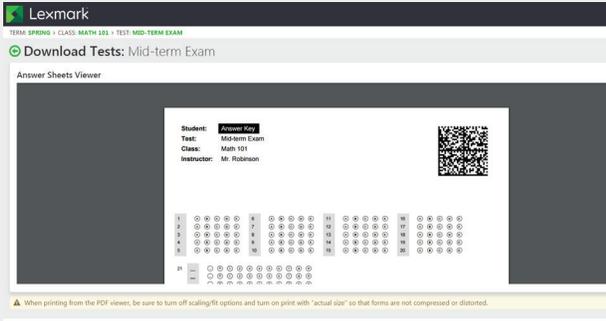

Create summary reports

Reporting capabilities help you respond to individual learning gaps or class comprehension issues, and the solution provides different reports that can be downloaded for more detailed reviews.

How does Testing Assistant work

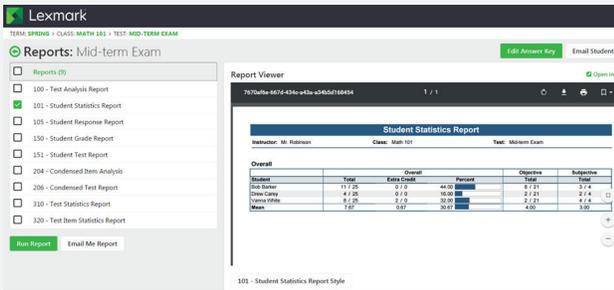

1 Create and print custom answer sheets

2 Send completed tests to the cloud from a Lexmark MFP

3 Grade, report and manage tests for all students and classes

Benefits for education customers

- ✔ **Saves time**
 - ▶ Eliminate manual grading and assessments
- ✔ **Saves money**
 - ▶ Create your own personalized answer sheets with no special paper required
- ✔ **Easy to learn and use**
 - ▶ Straightforward web interface from any modern web browser
- ✔ **Online testing for remote learning**
 - ▶ Create and distribute tests online. Students can submit to the cloud for grading.
- ✔ **Provides comprehensive test analysis**
 - ▶ Built-in grading reports that show performance on tests
