

Making Remote Work, Work.

Windows Apps to Any Device from the Browser

Whether you're simply enabling greater workforce flexibility or enacting a mandatory work-from-home policy to protect your people, Cameyo makes remote work more productive for everyone.

Cameyo provides your people with seamless access to all of the business-critical applications they need to be productive – all while protecting your people and your business continuity.

Cameyo's virtual application delivery platform enables your people to quickly and easily access the Windows and internal web applications they need, securely from the browser, without the need for VPNs. They get the full desktop version of their applications, without the apps needing to be installed and managed on their devices.

"Employees are demanding remote work policies, bring-your-own-device programs, and broader use of mobile devices and applications. To remain competitive, employers must enable this modern technology experience while implementing the appropriate end point management and security controls."

Mark Bowker, Senior Analyst, Enterprise Strategy Group

Simple

Setup takes minutes with little to no IT experience necessary and support is always free.

Cost-Effective

Multi-tenant platform leverages cloud savings with a per-user subscription to prevent bill shock.

Secure

Built-in security features include HTTPS, single sign-on, separation of apps from the OS, and more.

No VPNs

Cameyo securely delivers Windows & internal Web apps without the need for VPNs.

Increased Productivity

Keep your people productive with access to all business-critical apps, even over 2G/3G networks.

Cloud Native

A built-for-the-cloud service that runs in any environment – cloud, hybrid cloud, or on-premises.

"When COVID-19 hit and our students couldn't come to the learning centre, we were about to lose all of our customers overnight. Cameyo enabled us to transform our programs into a distance learning platform within days, enabling our students to continue their after-school education. Without Cameyo, we would have lost our entire business."

- Jeffrey Quinn, Principal, Frontrunner Learning Centre

Enabling Greater Workforce Flexibility with Cameyo

Increase Productivity

- Access to business-critical apps from the browser
- Seamless user experience
- Works even on poor home and cellular networks

Reduce Cost & Complexity

- Eliminate the need for costly infrastructure without VPNs
- Reduce management costs and simplify user experience
- 10x cost savings compared to VDI and DaaS

Superior Security

- Non-persistent servers
- Corporate network separated from end user device
- Apps delivered from behind the firewall and over HTTPS

The Cameyo Virtual Application Delivery Platform

Cameyo is the most cost-effective and secure way to deliver Windows applications to any device from the browser.

An offer to get you started:

- Free no-obligation trial
- Cloud usage costs included
- Free support
- Bulk discounts available
- Get started now by contacting your Azure account representative

Enabling 500 Remote Workers in 3 Hours

As the COVID-19 pandemic escalated, a large energy company in the UK quickly implemented a mandatory work-from-home policy. They determined that 500 employees throughout the enterprise would no longer have access to their billing and client management software, which was critical for keeping their business moving forward. In just 3 hours Cameyo was able to deploy the service and restore application access for all 500 users at the energy company, and delivered the platform as a fully elastic service in the customer's cloud environment to ensure user spikes do not impact performance.

The Benefits of Using Cameyo for Virtual Application Delivery

- **Cloud Native** - A built-for-the-cloud service that runs in any environment - cloud, hybrid cloud, or on-premises.
- **Cost-Effective** - Multi-tenant platform leverages cloud savings with a per-user subscription to prevent bill shock.
- **Simple** - No infrastructure required, setup takes minutes with little to no IT experience necessary.
- **Secure** - Built-in security features include HTTPS, Single Sign-On, separation of apps from the OS, and RDP vulnerability protection.

Why Cameyo?

By giving organizations of all sizes secure access to business-critical Windows and internal web applications from anywhere, Cameyo is delivering the simplest, most cost-effective way to securely enable remote work and cloud migration strategies. With no infrastructure required, customers can fully deploy Cameyo in hours, not weeks or months like VDI and DaaS.
