

# CyberPower

## POWER PRODUCTIVITY

Build trust and customer confidence when you sell power protection. UPS systems and surge protectors guard home office equipment from power events, keeping employees productive when working remote.

## PROVIDE PROTECTION

Most hardware should be connected to power protection. Make sure that your customers know about the following benefits:

### GUARDS EQUIPMENT

Defend against surges and provide graceful shutdown during extended outages

### LIMITS DOWNTIME

Employees stay productive and satisfied

### PROTECTS DATA

Safeguard vital network data from loss or corruption with uninterrupted, seamless power

### PROVIDES INSURANCE

The cost of power protection often pays for itself after one incident

# POWER SOLUTIONS

Protect productivity and technology for the home office.

## MOBILE DEVICES

### WALL TAP SURGE PROTECTORS

Prevents damage to computers, phones, printers, and other electronics by diverting excess voltage during a power spike.

Swivel features makes it easy to manage, organize, and assure cords are low profile - great for tight plugin locations.

CSP600WSURC5

## SMALL ELECTRONICS

### POWER STRIP SURGE PROTECTORS

Prevents damage to computers, phones, printers, and other electronics by diverting excess voltage during a power spike.

CSB706

## HOME NETWORKS

### COMPACT UPS SYSTEMS

Reliable backup power and surge protection from power events that can damage electronic equipment.

Battery backup for valuable electronics including computers, routers, and modems.

SL700U

## DESKTOPS AND WORKSTATIONS

### MINI TOWER UPS SYSTEMS

Featuring technology that corrects minor power fluctuations without switching to battery power, which extends battery life.

Battery backup and surge protection for desktop computers, workstations, networking devices, and home entertainment systems.

CP1500AVRLCD
