

10 benefits of Microsoft Teams for education

Centralize learning, work, and collaboration in one hub—whether your students and educators are on campus or off. Benefits include reduced IT support burden, an average of 216 hours returned to educators every year, and savings of \$5.3 million or more in IT expenses over three years.¹

BENEFITS FOR EDUCATORS

Bring everyone together in one digital classroom.

Teams is a central place for live class sessions, text and voice chat, calendars, assignments, quizzes, Live Events, and more.

Simplify collaboration and class management for educators.

Educators can prepare rubrics, post assignments, and stream lectures. Teams also enables internal meetings and sharing of course materials or lesson plans.

Empower educators to customize teaching and learning.

Educators can build tailored experiences through custom apps and tools right within in Teams, no coding experience required.

Personalize learning based on insights about student needs.

Using Insights in Teams, educators can track student and class progress, identify at-risk students, and take action to improve outcomes.

Include all students with built-in accessibility tools.

Microsoft offers a range of accessibility features, including Immersive Reader, dictation, live captions, translation, and more.

BENEFITS FOR IT

Connect users to the tools they need in a single pane of glass.

Teams connects to hundreds of apps—like Kahoot, Flipgrid, Prezi, and more—plus your LMS, and you control which apps users access.

Ease your management and support burden.

School Data Sync generates class rosters in Teams based on your SIS, and using Teams as a hub negates the need for so many point solutions.

Streamline processes with apps, flows, and bots.

Power Platform integrates with Teams for customizable low-to-no-code apps, flows, chatbots, and analytics to save time on daily tasks.

Get actionable data to help school leaders optimize learning.

The Insights feature helps leaders discover trends, identify areas for improvement, and adapt your school's remote learning strategy.

Easily manage policies and help ensure student safety.

Set policies for team naming, get visibility into security threats, and identify and address offensive language and threatening behaviors.

Rely on robust security features.

Teams is built on Azure, a trusted cloud platform that prevents unwanted users from accessing meetings and defends data, apps, identities, and devices.

Simplify the compliance process.

Azure includes certifications for FERPA, HIPAA, and 40+ other regional and global compliance standards, including standards specific to education.

Get started for free with Microsoft Teams.

Microsoft 365 A1 with Teams is available at no cost for education. If you upgrade to M365 A5 for features like Advanced Threat Protection, you still save compared to paying for multiple solutions.

“Microsoft Teams is so good that it's ridiculous, and it's not just great for our students. There's a real sense of support, that Microsoft is really **listening to the users**, to the teachers. And they're listening to the students, and they're making changes in real time.

David Olinger
Director of Digital Strategy, O'Dea High School

“Engagement is one of the most important things in teaching. Using Teams grabs the students' attention and makes learning part of their everyday lives... What was their learning community? **Their learning community was Teams.**

David Kellermann
Senior Lecturer, The University of New South Wales
