

# A Cisco Room Kit for Every Room

## Huddle Space

## Conference Space

## Training & Briefing Spaces

**Participants:** 1-5  
**Solutions:** Room Kit Mini, DX80

**Participants:** 3-10  
**Solutions:** Room Kit, Room Kit 55

**Participants:** 7-100+  
**Solutions:** Room Kit Plus, Room Kit Pro, Room Kit 55 Dual, Room Kit 70, Room Kit 70 Dual

Bring your own screen! The **Room Kit Mini** can be wall- or screen-mounted for use with any HDMI-capable screen. The Room Kit Mini has a wide 120° view and is ideal for spaces with 3-5 people. Integrated microphones focus on the participants and can cut the background noise of an open space.

Bring your own screen! Slightly larger than the Room Kit Mini, the **Room Kit** can be wall- or screen-mounted. The Room Kit is ideal for rooms of up to 7 people. A built-in mic and camera capture the room from a single device. If a table mic or two is needed those can be added, too.

The **Room Kit Plus Codec** can be built with your choice of Quadcam or P60 cam and supports rooms of up to 14 people. It offers multi-screen capability, 3 mic inputs (external mic required), and can utilize a second camera. The Quadcam's internal mics track participants speaking in the room. Add the HDMI display(s) of your choice.

The **DX80** is ideal for a personal workspace. Video meetings are quick and easy for 1-3 people and the device doubles as your phone.

The **Room Kit 55** includes a built-in screen, mic, and camera. These are ideal for small to medium-sized meeting rooms with 7-10 participants. Two table mics can be added for increased audio coverage.

The **Kit Pro Codec** includes 6 video-in and 3 video-out ports, 8 mic ports, and choice of cameras. Add the HDMI display(s) that work for you. The Kit Pro also supports Presenter Track.

**Room Kit 55 Dual** includes two 55" screens with speakers and utilizes the Kit Plus Codec.

**Room Kit 70** (one screen) and **Room Kit 70 Dual** (two screens) utilize the Kit Pro Codec.  
**Customize these as needed to fit large rooms!**
