

ProAV & Collaboration solutions

Solutions for Multiple Applications & Markets for an Integrated Experience

Boardroom | Huddle Space | Digital Signage | Education | Healthcare
Government | Finance | Hospitality | Retail | Home Theater
House of Worship | Esports | Restaurant/Café | Command & Control

As the continued growth in the AV and systems integration industry builds from about \$247 billion in 2019 to \$325 billion in 2024, solution providers are poised to experience an unprecedented opportunity in intuitive and intelligent client solutions.

Unified communications remains the front runner with the largest growth rate moving into 2020, followed by digital signage solutions as the area with the largest application rate by 2024. These projections provide a solid case for existing providers to take their ProAV/ Collaboration practice to the next level, and provides those that have yet to experiment in the segment to ride the tailwinds of this lucrative and emerging market.
