

AXCIENT™

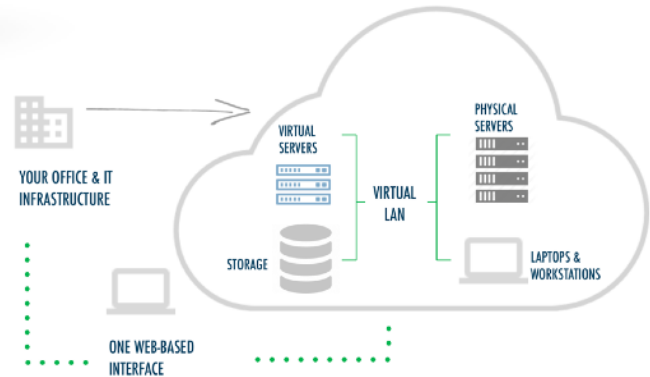

AXCIENT BUSINESS RECOVERY CLOUD

The world's first business recovery cloud

The Axcient solution was built from the ground up to take full advantage of modern cloud technology and represents the latest developments in data protection and recovery. The Axcient technology was – and continues to be – developed in-house without the use of third-party software or licenses.

SOLUTION ARCHITECTURE

How It Works

HYBRID CLOUD SOLUTION

Local and cloud protection for all of your servers, laptops, workstations and physical or virtual environments

SECURE CLOUD TECHNOLOGY

State-of-the-art data centers that comply with stringent security guidelines and industry regulations

REVERSE INCREMENTAL TECHNOLOGY

Axcient stores your most recent server image atop older incrementals. Your newest data is easiest to access, whenever you need it

PHYSICAL & VIRTUAL SERVER PROTECTION

Protects physical and virtual environments, including Windows, Linux, VMware, MS Hyper-V and Citrix XenServer

MANAGE-BY-EXCEPTION

A color-coded Web-based dashboard where you'll see all protected sites in one screen and can quickly identify what needs your attention

GRANULAR RECOVERY FOR EXCHANGE & SQL

Quickly recover entire databases or individual objects like mailboxes, emails and files with full text search capabilities

SERVER FAILOVER & VIRTUALIZATION

Instantly spin up a virtual image of a server locally or in the cloud

FULL OFFICE VIRTUALIZATION

Instantly setup a virtual office in the cloud so employees can continue working

RECOVERY POINT RESTORATION

Recover any protected server by restoring to VMDK, VHD or BMR

The Axcient Business Recovery Cloud is a consolidated hybrid cloud solution that provides both local and cloud protection for physical and virtual servers, laptops and workstations.
