

### Axcient Business Recovery Cloud (BRC)

#### Worry-Free Business Continuity with Axcient

Your organization is critically reliant upon IT systems, which can inflict significant financial harm when they go down. And let's face it – sometimes things go wrong. Laptops get stolen. Email servers fail. Someone accidentally deletes an important file or folder. Systems get hacked, files get corrupted and as we all know, disasters do happen.

Without a means of business continuity, system outages or lost data can halt productivity and incur potentially unrecoverable losses to customer satisfaction, sales, reputation and revenue. When systems fail, you want the peace of mind that your applications and data can be restored quickly.

Axcient / eFolder is the leader in Recovery-as-a-Service and ensures your business is always on and always protected.

#### Powerfully Simple Recovery-as-a-Service

Axcient BRC helps companies keep employees productive, IT systems running, and data always accessible from anywhere at any time. We do this with our unique cloud technology that mirrors the company's entire IT infrastructure in the cloud and gives you multiple recovery options from a single image-based snapshot of your systems. Recover data, failover servers, or virtualize the entire office with a click from a single Web-enabled interface. Companies using Axcient BRC experience a 60% reduction in overall costs related to data protection while improving their Recovery Time Objective (RTO) to just minutes.

#### Key Features:

- Agentless solution, no software to install, easy to deploy and maintain
- Total Data and Application Protection, consolidated hybrid cloud solution that provides local and cloud protection.
- True business continuity, instant virtualization of entire office in the Axcient cloud
- Secure Cloud Technology, State-of-the-art data centers that comply with stringent security guidelines and industry regulations
- Any-to-Any Recovery, protects and recovers any physical server to virtual server and vice-versa (P2V, V2V, V2P)
- Manage by Exception, a single web-based interface to manage all deployments and simultaneously verify health of multiple appliances at different locations
- Granular Recovery for Exchange & SQL, provides a fast, easy-to-use way to recover entire databases or individual objects like mailboxes, emails and files with full text search capabilities

### ABOUT US

Axcient / eFolder is a leading supplier of cloud data protection, business continuity and cloud file sync solutions for MSPs, cloud service providers, system integrators, and VARs. Business Continuity for BRC pairs advanced backup software offered by BRC with the massive cloud storage and recovery capabilities of the Axcient Cloud.

## Axcient Business Recovery Cloud (BRC)

### Data and Application Protection

- Protects physical and virtual environments, including Windows, Mac, Linux, VMware, MS Hyper-V and Citrix XenServer
- Reverse incremental technology for fastest possible restores
- Application-aware backups (Exchange, SQL, Active Directory and Sharepoint)
- Anti-corruption technology to ensure health of backups
- Automatic de-duplication
- Customizable scheduling and retention policies for compliance and archiving

### Granular Recovery for Exchange & SQL

- Instantly restore objects or datasets to a live SQL database or to offline SQL scripts
- Instantly recover to individual MS Exchange instances or to Clusters (CCR/DAG)
- Recover point-in-time Exchange mailboxes, as well as individual objects - such as messages, calendar appointments, attachments, contacts and more, all on a granular level.
- Comprehensive text search facility enables users to quickly and efficiently locate files from Exchange/ SQL Server backups

### Manage by Exception

- A single web-based interface to manage all deployments
- A color-coded Web-based dashboard that allows user to quickly diagnose and correct any gaps in protection
- Daily health digests, provides an overall health status of customer sites and services
- Time-Based Alerting Thresholds and Exception-Based Notifications
- Full integration with Autotask and Connectwise
- Comprehensive report generation facility.

### Business Continuity

- Full office replication and failover to the cloud
- Create complete server or desktop images to restore to different hardware
- Conduct local failover and full system recovery
- In the event of a site failure, a new, fully replicated onsite appliance is sent overnight
- Restore back to the replacement server at your convenience after business continuity
- Data is encrypted in transit and at rest in our offsite SOC II Type II certified datacenters

### Secure Cloud Technology

- SSAE 16 Type II or SOC Certified
- 100% uptime cloud service-level agreement (SLA)
- 99.999% reliability, translating to less than 5 minutes average downtime per year
- Data transferred over Secure Sockets Layer (SSL) encrypted connections

### Any-to-Any Recovery

- Recover files, folders, and databases
- Recover MS Exchange and MS SQL Server, databases and objects
- Restore full systems to dissimilar hardware via BMR
- Failover physical and virtual servers with a click
- Easily migrate systems (P2V, V2V, V2P)
